BACKGROUND:

On August 18, 2017, the Office of the United States Trade Representative (USTR) initiated an investigation under Section 301 of the Trade Act of 1974 into the government of China's acts, policies, and practices related to technology transfer, intellectual property, and innovation. On March 22, 2018, the USTR issued a notice of determination and request for comments that stated that the government of China's acts, policies, and practices covered by the investigation were found to be actionable under Section 301(b) of the Trade Act. The notice proposed the imposition of additional import duties on a preliminary list of 1,300 Chinese products, and indicated that a final list would be forthcoming after the period for public comment expired. See Federal Register, 83 FR 14906. On June 15, 2018, the USTR issued a notice of action providing for the imposition of additional import duties on a final list of Chinese products.

booking loads highly recommended. According to ATA (American Trucking Association), there is currently 50,000 truck drivers shortage in the US. With ELD (Electronic Logging Device, truckers now lack flexibility for drive time (if a driver has maxed out their hours...). ELD has further segmented port drayage with some drayage companies electing to only less than 100 miles deliveries versus the over 100 miles which require ELD compliance. Ask your trucker. Learn. And Support. The more you understand your local trucking company's efficiencies are; the more productive and cost-effective your drayage services will be. Check out local port services like:

- **Jupigo:** A collaborative logistics platform for harbor truckers and dispatchers to connect and interact. <https://www.jupigo.co/>
- **Drayview:** Innovation uses the latest in advanced technology to provide data on matters affecting freight moves. <https://drayview.com/oakland/>
- **Oakland Portal:** A one-stop, online gateway to the Port of Oakland went live in May. The Port said its new tech platform, called the Oakland Portal, would provide a single point of entry to seaport operations. It's believed to be an industry first in the quest to digitize containerized cargo transportation. <http://portofoakland.emodal.com/>

Trade Policy Updates

A change to accommodate hourly absolute quota allocation was deployed into the CERTIFICATION environment on 6/28/2018 at 0600 EST and is available for testing.

A PRODUCTION deployment date for this functionality has not yet been determined. A follow-up CSMS will be sent out with that information once finalized.

The allocation of absolute quota commodities will run hourly and the presentation date/time will be determined based on Eastern Standard Time.

If you have any additional questions or encounter any issues when testing please contact your CBP Client Representative.
